DETAILED ACTION

Applicant's Amendment and Terminal Disclaimer filed on 6-30-04 have been received and entered in the case. Terminal Disclaimer is not effective since Applicant has canceled all original claims (1-59) rejected by Double Patenting. Currently, claims 60-78 are newly added and pending.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 60-78 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 60-65 and 67-71 of copending Application No. 10/136,321 (hereinafter "321"). Although the conflicting claims are

Art Unit: 2816

not identical, they are not patentably distinct from each other because their scopes are essentially the same.

The scopes of claims 60-71 of the instant application are the same as that of claims 60-65 and 67-71 of the "321". It is noted that limitations "a power input" and "core logic" of the instant application read on limitations "voltage regulator module" and "logic components", respectively, of the "321". And the method recited on claims 72-78 read on an apparatus recited on claims 60-61 and 68-69 of the instant application. Therefore, the entire claims (60-78) of the instant application are rejected under the judicially created doctrine of obviousness-type double patenting over copending Application No. 10/136,321.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Amendment

3. Terminal Disclaimer filed on 6-30-04 for overcoming Double Patenting of claims 1-59 is no longer needed since Applicant has canceled claims 1-59 and replaced them with claims 60-78.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2816

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
